What's next

Vertex AI includes the following tools to help data scientists and software engineers develop machine learning (ML) workflows:

- The [Vertex AI SDK](#) is a comprehensive set of classes written in Python that lets you automate an ML workflow. With the Vertex AI SDK, you can use the Python language to accomplish anything you can do in the Google Cloud console. For more information, see [Introduction to the Vertex AI SDK](#).
- [Vertex AI Workbench](#) is a Jupyter notebook-based development environment that data scientists can use for their entire ML workflow. For more information, see [Introduction to Vertex AI Workbench](#).
- [Terraform](#) is an infrastructure-as-code (IaC) tool that you can use to provision resources and permissions for multiple Google Cloud services, including Vertex AI. For more information, see [Terraform support for Vertex AI](#).
