Creates a Dataset.

HTTP request

POST https://{service-endpoint}/v1/{parent}/datasets

Where {service-endpoint} is one of the supported service endpoints.

Path parameters

Parameters	
parent	string Required. The resource name of the Location to create the Dataset in. Format: projects/{project}/locations/{location}

Request body

The request body contains an instance of Dataset .

Response body

cloud.google.com uses cookies to deliver and enhance the quality of its services and to analyze traffic. If you agree, cookies are also used to serve advertising and to personalize the content and advertisements that you see. [Learn more.](#)

Agree

No thanks

requires the following OAuth scope:

- https://www.googleapis.com/auth/cloud-platform

For more information, see the [Authentication Overview](#).

IAM Permissions

Requires the following IAM permission on the parent resource:

- aiplatform.datasets.create

For more information, see the [IAM documentation](#).
